Dear Mark,

Herein is a copy of the actual letter that I sent to Alaskan Copper with the recycling credits. The Department of Ecology will only accept the percent solids of the material. WRC considers the material to be 100% recycled but they will only accept the solids. If I can be of any more assistance, please let me know.

Patricia P. Nelson

February 7, 1997

Mr. Gerald A. Thompson
Alaskan Copper Works Inc.
3200 Sixth Avenue South
Seattle, Washington 98134

Dear Mr. Thompson:

In accordance with the requirements of the Washington State Department of Ecology, World Resources Company (WRC) is happy to provide you with the following information needed to determine the exact amount of Alaskan Copper Works Inc.'s material recycled by WRC during calendar year 1996.

WRC is aware that the State of Washington requires a copy of the recycling credit documentation. In the past, Ms. Holly Sullivan at the Department of Ecology has been receptive to a copy of this letter as sufficient proof of recycling credit documentation.

The following information is provided for use in your submittal:

	Total Wet Tons Received	Average Percent Solids	Total Dry Tons
F006 Material	5.63 7.83	30.82	2.41
D007 Material	49.02 61.95	85.13	52.72

After consultation with WRC corporate technical and legal personnel, it appears that the Form Code of B306 (if you use lime or hydroxide to precipitate your metals) or B319 (other waste inorganic solids) might be appropriate choices to be used in preparing your submission. These codes are from the Washington Department of Ecology Book 2 Guidebook and Codes. Additionally, the System Code of M014 (other metals recovery for reuse) would be applicable to WRC's recycling process. WRC expands on the M014 description with "thermal concentration and compounding to produce metal concentrate products via an industrial process," which best describes WRC's recyclable material management.

Please be advised that in accordance with 40 CFR §262.11 the ultimate decision as to the classification of the hazardous waste (e.g., the Form Code) rests with the generator, and the views expressed by WRC herein, should not be considered as legal advice or substituted for the more accurate generator's technical knowledge or laboratory analysis of the recyclable materials and the generation process used.

If you have any questions regarding this information, please contact me at 1-800-WRC-1955.

Sincerely,

WORLD RESOURCES COMPANY
